This manual contains the solutions to many of the problems in the book Econometric Analysis of Cross Section and Panel Data. Included are several bonus questions, along with answers. The empirical examples are solved using various versions of Stata, from 4.0 through 7.0. because it is helpful to see the computer output of a widely used econometrics package. Already established as a leading graduate econometrics text, the book offers an intuitive yet rigorous treatment of two methods used in econometric research, cross section and panel data techniques. The numerous end-of-chapter problems are an important component of the book, encouraging the student to use the analytical tools presented in the text. This manual contains answers to selected problems, new examples, and supplementary materials designed by author.
